-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 61-70, drawn to a method for recovering plant cells from cryopreservation which includes use of a stabilizer, classified in class 424, subclass 278.1.
- II. Claims 22-23, 25 and 71-74, drawn to a method for recovering plant cells from cryopreservation which requires incubation in a medium having at least one ethylene inhibitor, oxygen radical scavenger, divalent cation or cryoprotective agent, classified in class 435, subclass 420.

The inventions are distinct, each from the other because of the following reasons:

The method of Group I is different and distinct from the method of Group II since the steps of Group II require a specific medium for which to carry out the incubating step, wherein the medium contains different ingredients of which do not include a stabilizer as required of Group I. Group II is further different and distinct since at least one of an ethylene inhibitor or oxygen radical scavenger, or divalent cation are required. The steps of each method of Group I and II are distinct one from the other in that different things are required. For example, the method steps of Group I require the cryoprotectant to be removed wherein as when a cryoprotectant is included in Group II but not a stabilizer the cryoprotectant is not required to be removed in a separate process step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is 571-272-0924. The examiner can normally be reached on 9:30-6:00.
